

Introduction to Intelligent Analytics

Session Plan

Learning Objective:

By the end of the session you will be

- Able to explain the significance of data visualization.
- Understand the story telling of data visualization
- Will be able to see the best visuals of 2021

Research Insights

- We typically process images 60,000 times faster than a table or a text - SHIFT Disruptive Learning participants retained between 10% and 20% of written or spoken information, compared with 65% of visual information.
- Another research suggested that human mind can see an image for just 13 milliseconds and store the information, provided that it is associated with a concept.
- Our eyes can take in 36,000 visual messages per hour.
- 40% of nerve fibers are connected to the retina.
- Humans have an attention span of just eight seconds – Gartner
- Ninety-nine percent of all sensory data gets filtered out of the brain immediately. Visual data is in the 1% that is left. This is known as the “picture superiority effect.” – Gartner
- Cognitive psychologist Jerome Bruner suggests we are 22 times more likely to remember a fact when it has been wrapped in a story. Why? Because stories are memorable.

Your opinion matters

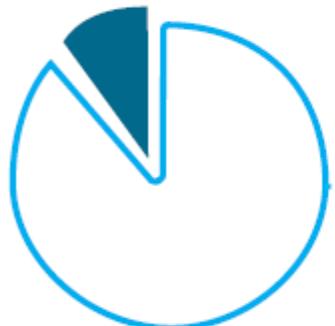

Visualize helps to recall

Graphic superiority : Recall after three days

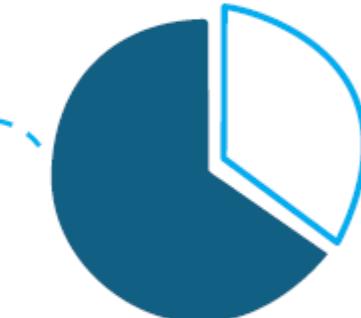

HEAR INFORMATION

When people hear information, they remember only 10% 3 days later

SEE INFORMATION

When paired with a relevant image, people retain 65% 3 days later

Interested in knowing what is Data....Lets
get started

What's Hiding in Your Unstructured Data?

Source: Graphic adapted from January 2018 CXPA Presentation "The Why Behind the What," Jim Kitterman

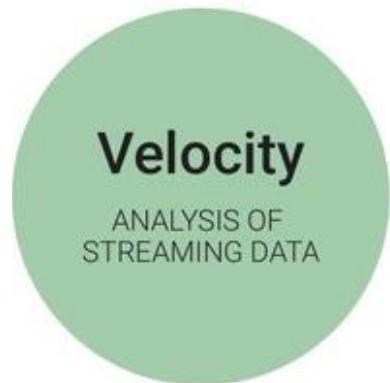

5 v's of Data

THE 4 V'S OF BIG DATA

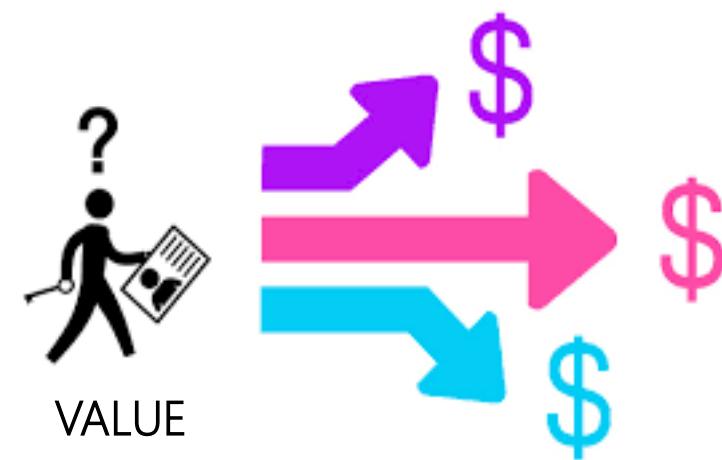

2.5 QUINTILLION BYTES
of data are created
each day

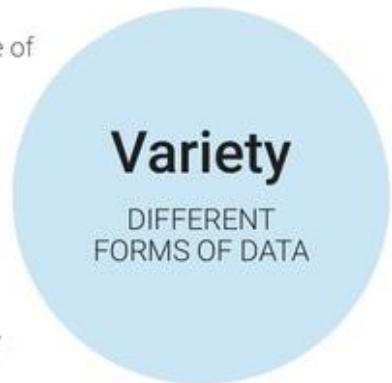

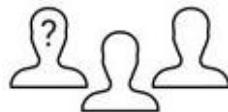

close to
100 SENSORS
that monitor items such as
fuel level and tire pressure

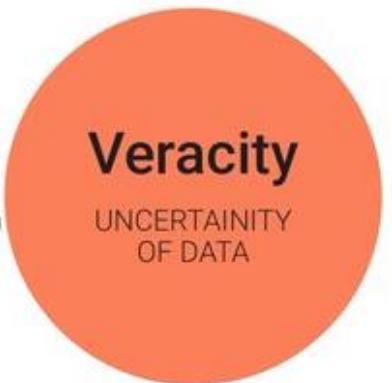

VALUE

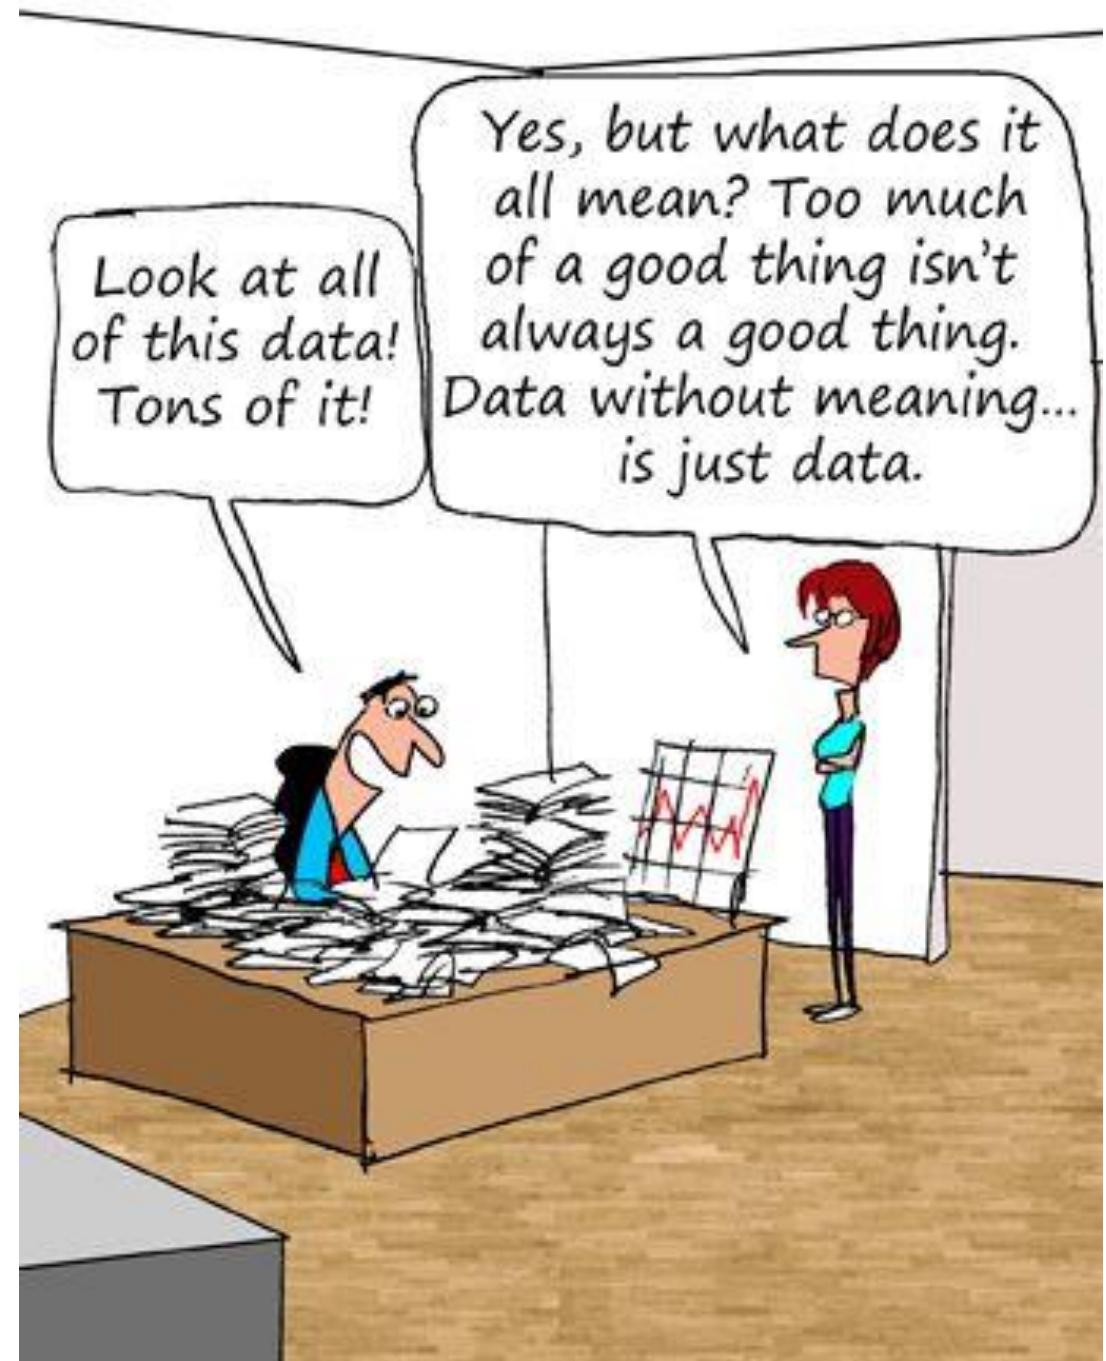

LEADERS
don't trust the information
they use to make
decisions

As of 2011, the global size of
data in healthcare was
estimated to be
150 EXABYTES

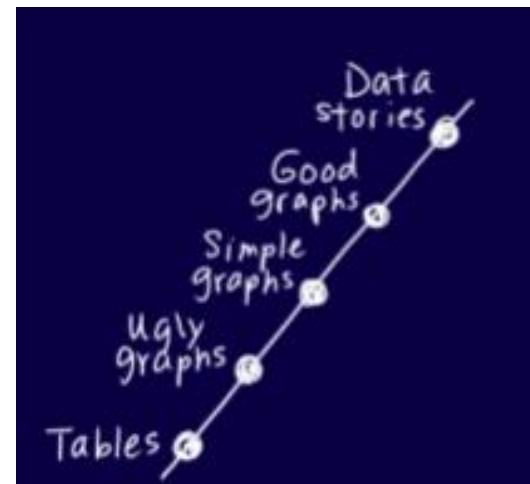

But here is a
caveat...any
guesses?

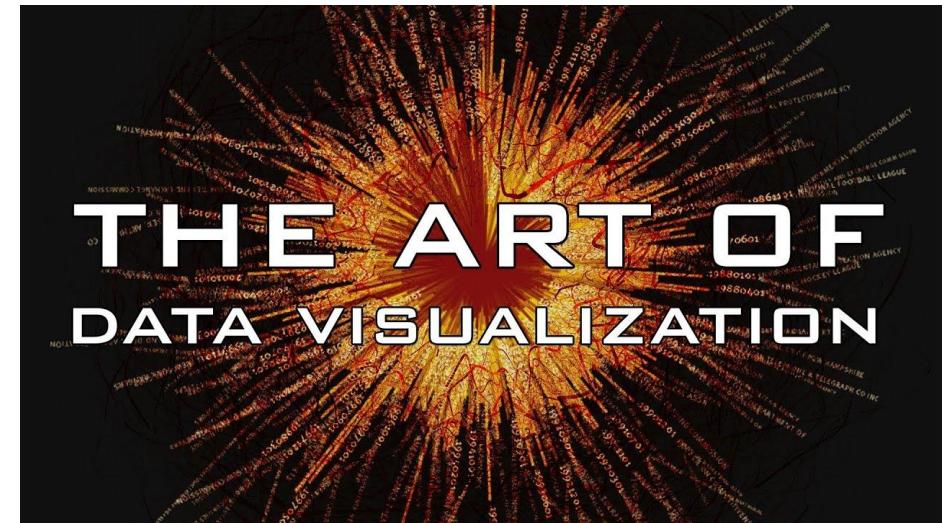

Abundance of Data has its own challenges

- Human brain has not advanced at the same rate of data.
- Comprehensive and expansive (sometime expensive as well) are worthless without a way to understand their qualities and to translate those qualities into actionable insights.
- Good comprehension of methods and data will make the best productive use of the data and the information.

Turning Data into Art

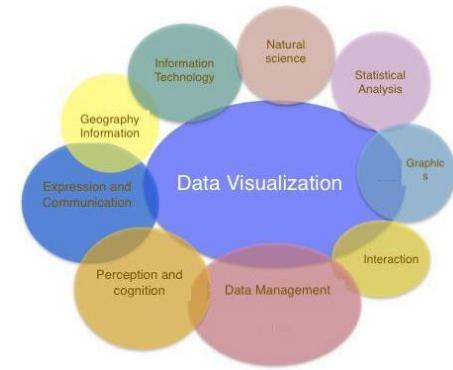

- The purpose of visualization is insight, not pictures- **Henry D Hubbard**
- Visualization acts as a campfire around which we gather to tell stories – **AL Shalloway**
- Words may be mightier than the sword, but in a battle for our brains, visual images win every time - **Colin Ware.**

Can you Interpret this visual?

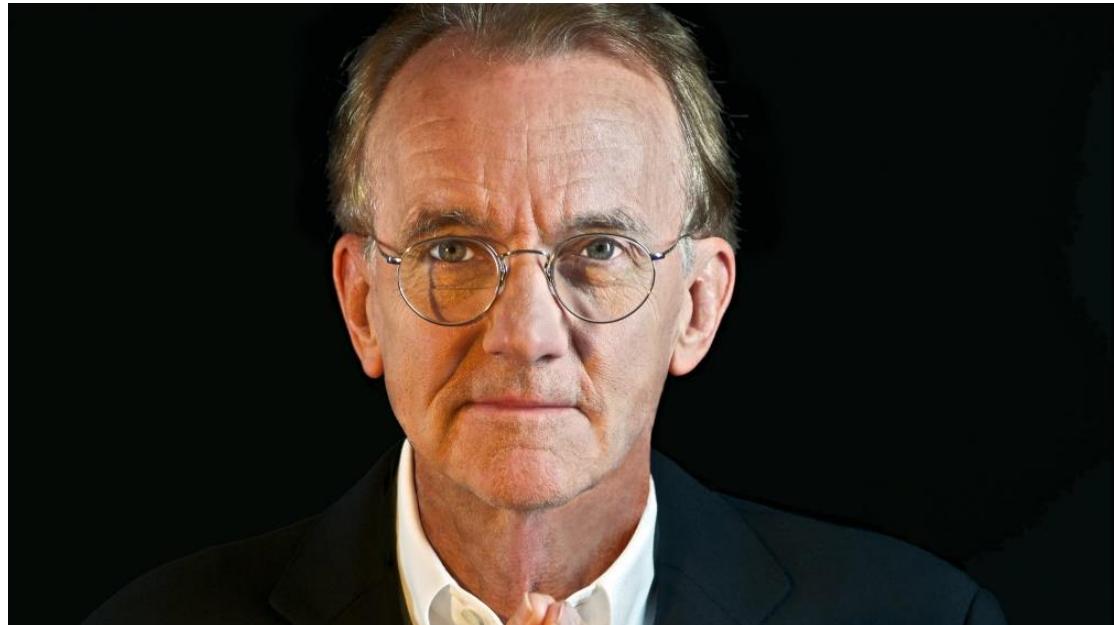

Data visualization

- Data is an ingredient and the visualization is the art that adds value, richness and engagement to it.
- It democratizes data access, interpretation, and analysis.
- Data Visualization is a tool that can help us explore complex patterns in large quantities of data that cannot be directly perceived.
- As 4 V's of data, like Visualization have an acronym PEPP (Projections, explanations, perception and a plan)

Galileo of Graphics – Blooms Berg

Bloomberg
Business

Edward Tufte

“Indeed graphics can be more precise and revealing than conventional statistical computations.”

Graphical excellence is that which gives to the viewer the greatest number of ideas in the shortest time with the least ink in the smallest space.”

Anscombe's Quartet Showing the Importance of Visualization

1		2		3		4	
X	Y	X	Y	X	Y	X	Y

N = 11

mean of X's = 9.0

mean of Y's = 7.5

equation of regression line: $Y = 3 + 0.5X$

standard error of estimate of slope = 0.118

t = 4.24

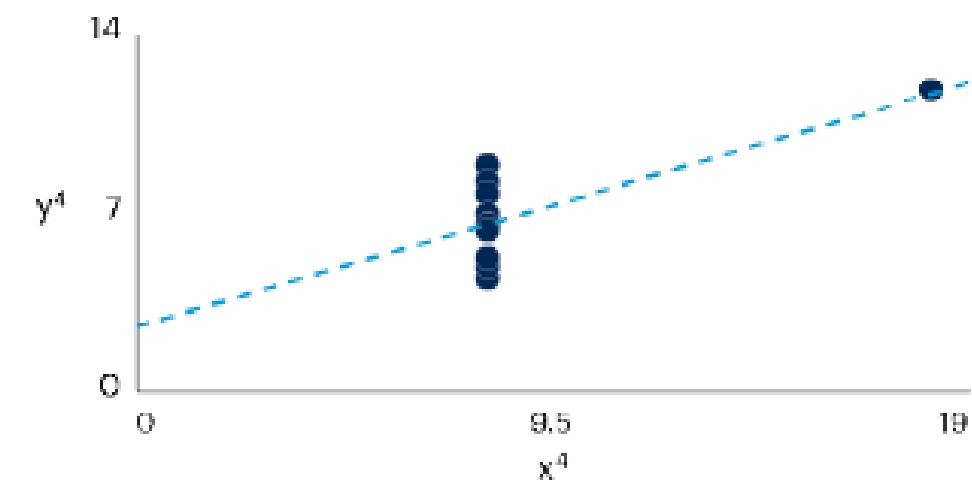

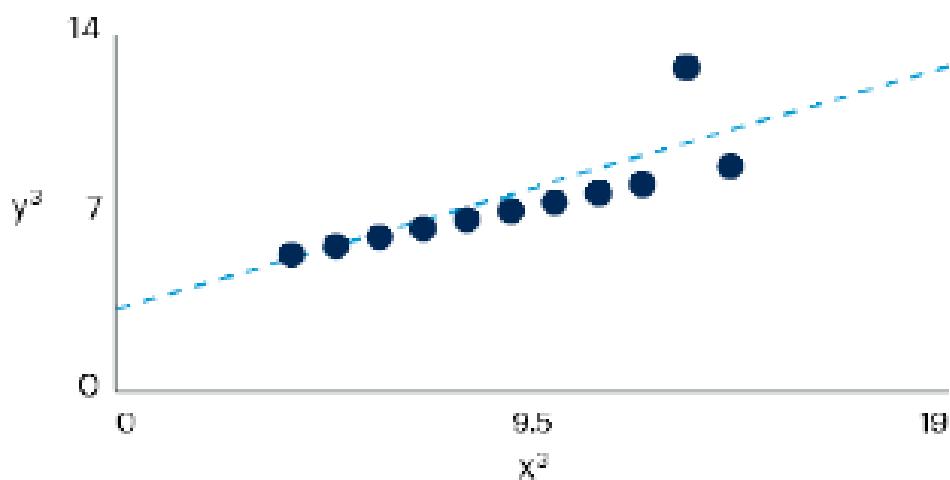

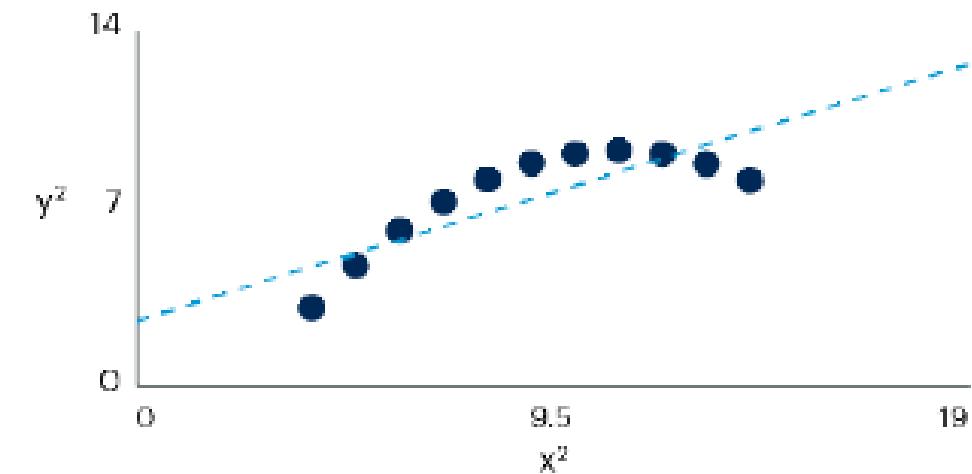

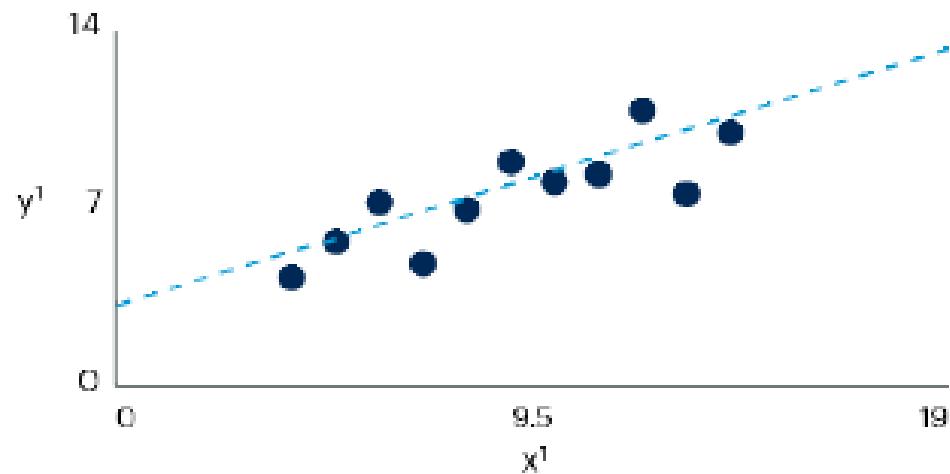

sum of squares $\sum (X - \bar{X})^2 = 110.0$

regression sum of squares = 27.50

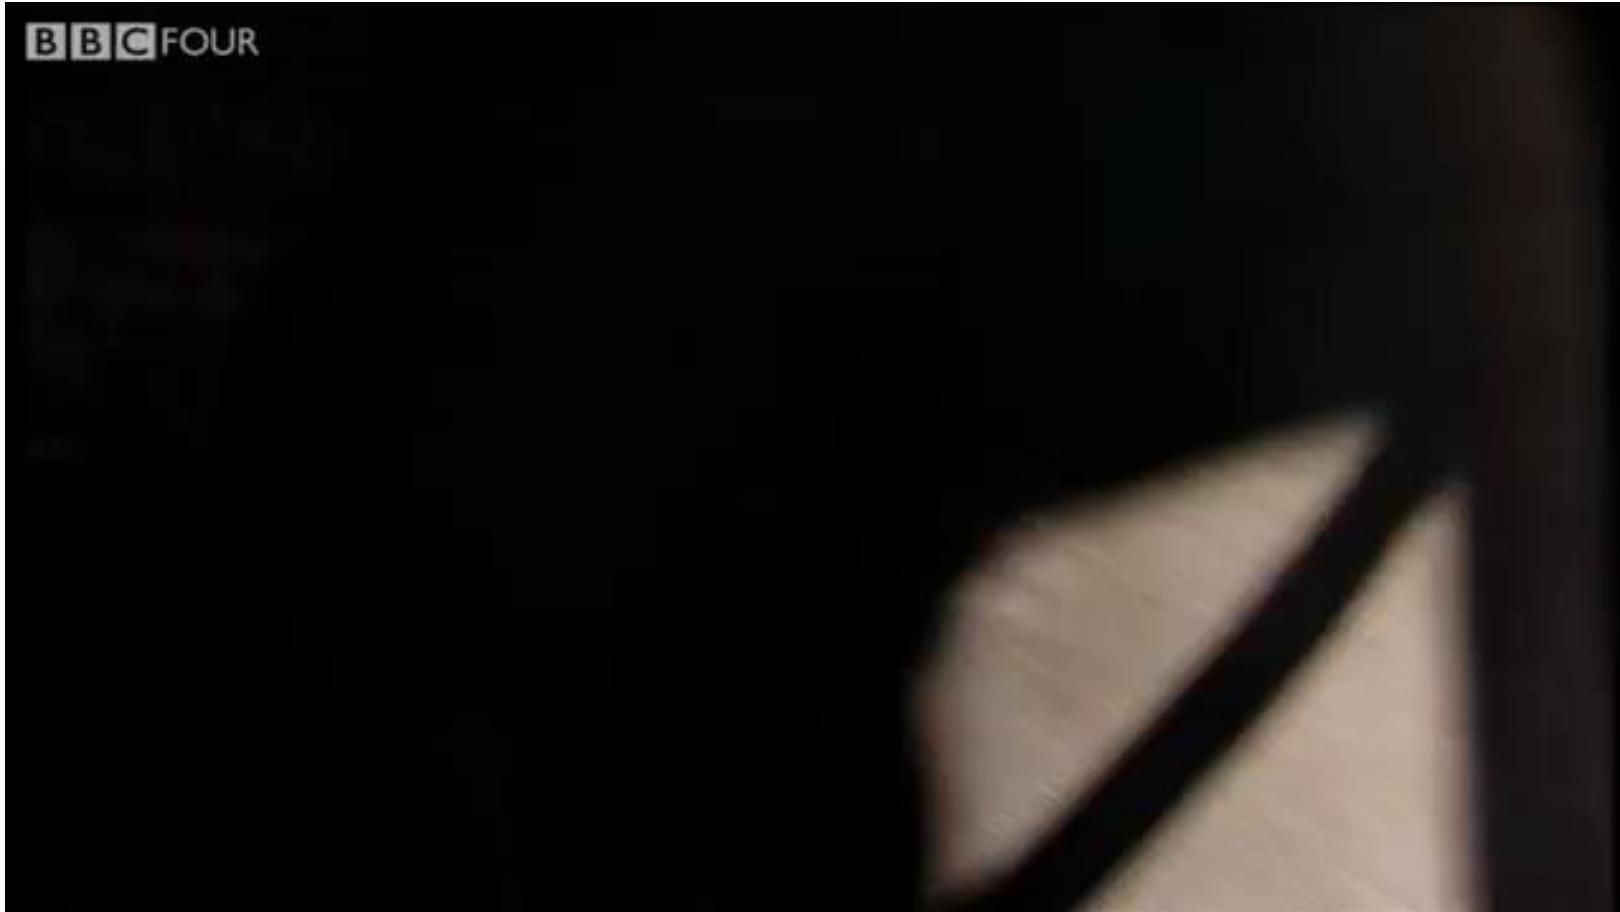

residual sum of squares of Y = 13.75

correlation coefficient = .82

r² = .67

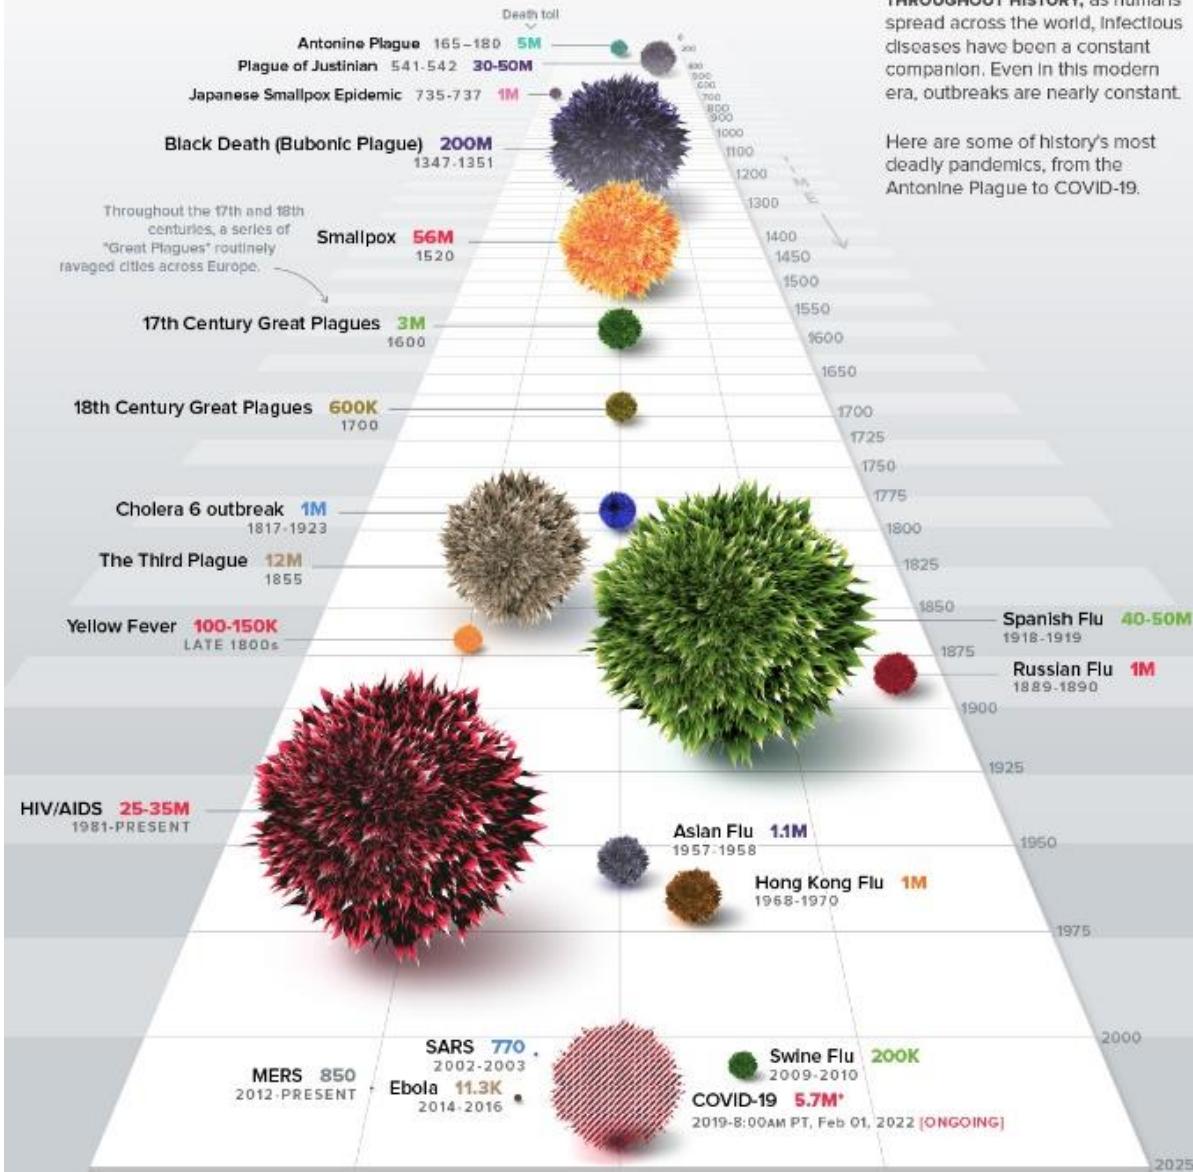

Dive into a panoramic view

HISTORY OF PANDEMICS

PAN-DEMI-C (of a disease) prevalent over a whole country or the world.

THROUGHOUT HISTORY, as humans spread across the world, infectious diseases have been a constant companion. Even in this modern era, outbreaks are nearly constant.

Here are some of history's most deadly pandemics, from the Antonine Plague to COVID-19.

WHO officially declared COVID-19 a pandemic on Mar 11, 2020.

It is hard to calculate and forecast the impact of COVID-19 because the disease is new to medicine, and data is still coming in.

Johns Hopkins University estimates

1. Bernard Arnault
3. Francoise Bettencourt
9. Francois Pinault

Three of the top ten wealthiest in the world (excluding the U.S. and China) are from France.

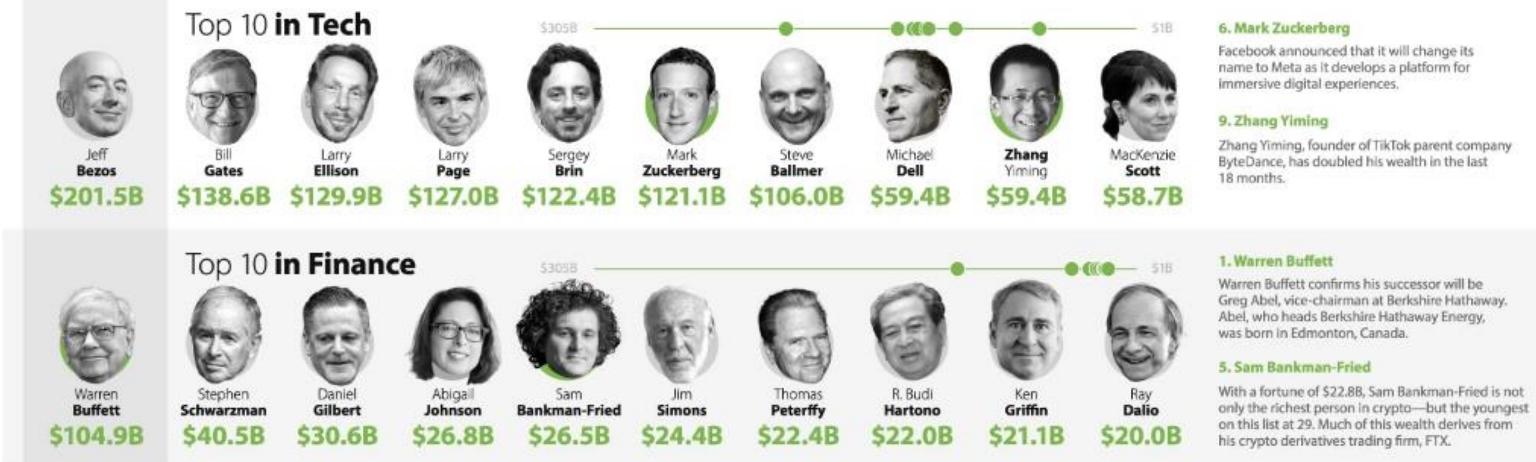

Top 10 Growth 2020-2021

Net worths as of November 8, 2021

Top 10 Billionaires in India

1. Zhong Shanshan

Before Zhong Shanshan took his bottled water firm Nongfu Spring public last year, he was largely unknown by the media.

4. Jack Ma

Formerly the richest in China, Jack Ma disappeared for three months after Ant Group's IPO was blocked by Chinese regulators. The company has since lost \$334B in market value.

1. Mukesh Ambani

India's richest man, Mukesh Ambani attracted billions in funding from Facebook (\$5.7B) and Google (\$4.5B) to build Jio Platforms' mobile network. It boasts over 750M internet users.

2. Gautam Adani

Gautam Adani controls India's largest port.

6. Mark Zuckerberg

Facebook announced that it will change its name to Meta as it develops a platform for immersive digital experiences.

9. Zhang Yiming

Zhang Yiming, founder of TikTok parent company ByteDance, has doubled his wealth in the last 18 months.

1. Warren Buffett

Warren Buffett confirms his successor will be Greg Abel, vice-chairman at Berkshire Hathaway. Abel, who heads Berkshire Hathaway Energy, was born in Edmonton, Canada.

5. Sam Bankman-Fried

With a fortune of \$22.8B, Sam Bankman-Fried is not only the richest person in crypto—but the youngest on this list at 29. Much of this wealth derives from his crypto derivatives trading firm, FTX.

1. Jerry Jones

Oil tycoon Jerry Jones is the owner of the Dallas Cowboys. The NFL team is worth \$5.7B, the highest in the league.

4. Arthur Blank

Arthur Blank, co-founder of Home Depot, owns the Atlanta Falcons.

1. Bernard Arnault 3. Françoise Bettencourt Meyers & family 9. François Pinault

Three of the top ten wealthiest in the world (excluding the U.S. and China) are from France.
